MENTAL HEALTH MONTH

'GO THE EXTRA K' - RUN/WALK CHALLENGE - 9K PER DAY

Walk *9000 steps or run 9k per day for 30 days for the 9 Australians we lose through suicide every day.

*9,000 steps are roughly equivalent to 7.2 kilometres. This is a good amount of walking for health benefits, with some studies suggesting it's close to the optimal number of steps to reduce mortality risk.
